PROFILE

Civil Engineer with 7 years of working experience in the Philippine construction industry. Projects include construction of High-rise Residential/Commercial Building, Coal-Fired Power Plant, and Naphtha Cracking Plant.

QUALIFICATIONS

June 2005 – May 2010

BS Civil Engineering

University of the Philippines – Diliman

PROFESSIONAL EXPERIENCE

Estimator

August 2015 – Apr 2018

D.M. Consunji, Inc., Makati, Philippines

Successfully won a PhP 1.8 billion (~35 million USD) contract for the Piling Works, Site Preparation, Early Works and Temporary Facilities, and Civil Works of the JG Summit Petrochemical Corporation OSBL for Stage 1 Expansion Project (Naphtha Cracking Plant Expansion) in Simlong, Batangas City.

- Uses AutoCAD to perform quantity estimates for site preparation, civil works, and architectural works based on construction drawings;
- Prepares Request for Quotations (RFQ's) for vendor and contractor services;
- Gathers subcontractors and suppliers' proposals to create record of cost for reference;
- Identifies labor, material, equipment, and time requirements by studying the scope of works, specifications, drawings, and related documents;
- Develops cost estimates by analyzing labor, material, equipment, and time requirements using MS Excel;
- Works with operations staff and fellow estimators in creating preliminary construction schedule using MS Excel chart;
- Conducts site visits to analyze existing site conditions and to determine any required scope that is not indicated in the bid documents;
- Submits RFI's and clarifications;
- Prepares cost estimates for General Requirements using company-provided worksheet;
- Develops total bid cost for management review, and submission.

Office Engineer

Oct 2012 – Aug 2015

D.M. Consunji, Inc., Batangas, Philippines

Successfully closed-out PhP 620 million (~11.7 million USD) subcontractor contracts (21 subcontractors) in the construction of 2x135MW Puting-Bato Coal-Fired Power Plant Project in Calaca, Batangas.

- Prepares Request for Proposals' (RFP's) needed for vendor and contractor services;
- Evaluates proposals by ensuring compliance to specifications, schedule, and budget;
- Execute quotation process for management approval;
- Evaluates subcontractors progress and prepare billings based on actual accomplishments;
- Negotiate revisions, changes and additions to contractual agreements with sub-contractors, and clients;
- Conducts project analysis of estimated vs actual work costs;
- Prepares estimates for variation orders.

QA/QC Engineer

Feb 2011 – Oct 2012

D.M. Consunji, Inc., Manila Philippines

Successfully handed-over 20 residential units of the 168 Residences Project in Binondo, Manila.

- Conducts field inspections and halt concealment of non-conforming work and activities;
- Issues non-conformance reports to operations group and re-inspects corrections;
- Assists in reviewing purchase documents to ensure compliance with quality control requirements;
- Prepares material submittals to client and monitor status to meet the scheduled installation date;
- Inspects material deliveries and reject non-conforming items;
- Ensures the correct implementation of the approved Inspection Test Plan according to project requirements;
- Performs final inspection prior to turn-over.
